

8th International Workshop on Laser-Induced Incandescence (LII)

This meeting is intended to bring together scientists from particle, combustion and atmospheric science to exchange and discuss recent trends and applications of Laser-Induced Incandescence and complementary techniques for particle diagnostics.

Topics

- Characterization of soot, (engineered) nanoparticles and aerosols
- Laser-Induced Incandescence and complementary optical and non-optical techniques

History

The (now) bi-annual workshop follows the tradition of previous workshops:

- 2005 – Duisburg, Germany
- 2006 – Bad Herrenalb, Germany
- 2008 – Ottawa, Canada
- 2010 – Varenna, Italy
- 2012 – Le Touquet, France
- 2014 – Ven, Sweden
- 2016 – Lake Tahoe, USA

Venue

The workshop will take place in Tutzing on scenic Lake Starnberg, South of Munich. Tutzing can be conveniently reached by car or public transport. For detailed transportation information please visit the workshop website.

Accommodation

A number of single and double rooms have been reserved at the „Evangelische Akademie Tutzing“.

Abstract Submission Deadline

April 20th, 2018

Notification on Acceptance for Oral or Poster Presentation

April 27th, 2018

Early Registration

€ 190, deadline: April 15th, 2018

Late Registration

€ 250, deadline: May 15th, 2018

Prereserved Accommodation Deadline

April 29th, 2018

Local Organization Committee

Klaus Peter Geigle (DLR Stuttgart)

Stefan Will, Franz Huber (LTT Erlangen)

Sponsors

Call for Abstracts

June 10th - 13th 2018
Tutzing, Lake Starnberg
Bavaria, Germany
